Powered Speaker  
**NX-50**

**Exhilarating sound and strong front panel design.**

TV or PC, tablet or smartphone. Hook it up and instantly the sound you hear is vastly bigger and better. The punched metal front grilles look rugged and you have five color choices to create your personal mood.

**Lively, clear sound is always fun to listen to.**

This is not your ordinary small speaker system. It's tuned to deliver maximum performance from every type of digital device. The unique cabinet shape prevents internal sound loss and gives the best possible frequency response. Plus, a bass port in the front pushes powerful bass sound straight out into the room, providing clear sound fields. There's even a loudness control that perfectly adjusts bass output to match the volume.

**Auto Standby and Auto Mix make daily use more convenient.**

How's this for easy operation: you don't have to turn the power on and off. Auto Standby automatically puts the unit into standby mode after a period of inactivity, then turns it on when a sound is detected. And with Auto Mix you can simultaneously play the two sound sources connected to the two input jacks — no need to switch inputs!!

**Main Specifications**

Input Terminals	Stereo L/R: 3.5mmφ mini jack x 2
Headphone Jack	Stereo L/R: 3.5mmφ mini jack
Maximum Output Power	7 W x 2 (6 ohms, 1 kHz, 10% THD)
Speaker Unit	7 cm (2-3/4") full-range cone
